

A screenshot of an Excel spreadsheet. The grid is mostly empty, with a few cells highlighted in grey. A small green rectangular selection is visible in the second row, third column.

1

Add your process data

Get the associated Excel data template from the Cross-Functional Flowchart – Data Visualizer template preview on the File > New panel.

2

Create diagram from data

Open Page-1, go to the Data tab and click on Create to launch the diagram creation wizard.

3

Get your diagram

Import the associated Excel data template to automatically generate the diagram.
